County launches battery recycling program

LĪHU'E – The County of Kaua'i is now offering a year-round battery recycling program for residents and visitors.

The following types of batteries are being collected through this program:

- Dry cell – e.g. A, AA, AAA, C, and D cell batteries
- Lithium – e.g. camera and cell phone batteries
- NiCad – rechargeable batteries

Battery drop-off service is available Monday to Friday from 7:45 am to 4:30 pm at the Kaua'i Resource Center (KRC). The center is located at 3460 Ahukini Rd. near the Līhu'e Airport.

The batteries must be separated according to type and placed in the appropriate drums inside KRC's main building.

Commercially generated batteries are not eligible for the household battery recycling program.

Used car batteries and uninterruptible power supply (UPS) backup batteries may be taken to the Līhu'e PS&D Tires/NAPA Auto Parts store for recycling.

For more information on battery recycling, please visit the county website,
www.kauai.gov/batteryrecycling or call the County Recycling Office at 241-4841.
